Look! a dodgy three-column layout!

With great layout power comes great, etc., etc.

Text scaling:
a cautionary tale.

```
cor(anscombe$x1, anscombe$y1)
```

```
[1] 0.8164205
```

```
cor(anscombe$x2, anscombe$y2)
```

```

```

Definitely don't need to visualize.
